

100 ChatGPT image commands

Upload a photo, type the command. 100 ready-made keywords from portraits to product shots and home makeovers to style, each copied with one tap.

burakozerweb.com/en/resources/chatgpt-image-commands

Upload your photo to ChatGPT, type one of the commands below and let ChatGPT do the rest. I've grouped 100 ready-made keywords under 10 headings, from portraits to product shots and home makeovers to style. Tap a command to copy it.

These are not official codes

Each command is a shortcut that tells ChatGPT what you want in a single word. Results can vary by model. Add a short detail next to the command (colour, setting, style) and the result gets much more accurate.

How to use them

1. Open ChatGPT and upload your photo (the + button in the message box).
2. Tap the command you want below to copy it, then paste it into the message box.
3. Add a short detail next to the command (colour, setting, style) and send.
